

# God's Eye Instructions:

1. Hold 2 sticks together to make a +. Tie yarn in a knot around the center of the cross.
2. Wrap the yarn around one stick in a loop, then turn the cross 90° and wrap the yarn around the next stick. Continue wrapping a single loop and turning the cross until you create a diamond-shaped center. Be sure to wrap each loop snugly against the previous one.
3. Cut the yarn off and tie a new color onto the end. Continue wrapping and turning to create a new ring outside first one. Cut and tie again each time you want to change yarn color.
4. Leave about half an inch of each end of the sticks uncovered to prevent yarn from slipping loose over the ends.
5. Leave about 6 inches of yarn at the end of your last color. Thread the end under one of the loops on a stick and tie the yarn in knot, leaving a big loose loop to hang the god's eye from.
