

LEEP INTO SCHOOL

The Lutherlyn Environmental Education Program's in-school program (LEEP into School) strives to develop an excitement in young people to explore the natural world around them.

Each activity is designed to continually engage students in exploratory learning. These activities will include a variety of games, songs, stories and hands-on interactions with real (but not live) animals that will be brought into the classroom.

LEEP into School

Price: \$75 for each 45-60 minute activity plus 50¢/mile for travel

Group Size: Activities are designed for individual classroom groups.

The LEEP Animals

For twenty years, LEEP has used professionally preserved wild animals to give students a hands-on experience with wildlife. These animals were not killed to become teaching tools. Most were hit by cars or died of natural causes. Taxidermists have professionally mounted these animals to be used for education. **Why not live animals?** Mounted animals can be handled and touched safely by children, they don't bite, and they don't make a mess!

LEEP INTO SCHOOL

Lutherlyn's renowned Environmental Education Program comes to your school!

Pre-K through
5th Grade

Classroom Activities

Use Your Senses

There is so much more to the natural world than most people perceive. This activity allows the students to actively use their fingers, ears, eyes, and noses to explore the world around them.

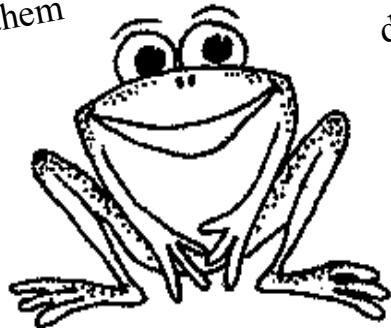

Animals in Winter

All animals need food, water, and shelter in the winter. This activity will help students explore what some common animals do to survive during the cold months of the year.

Flying Animals

Is a bat a bird? What makes an insect, an insect? Students will discover the differences between some common flying animals and what makes them unique.

Extreme Adaptations

Students will get a chance to discover the extreme, wacky, or odd changes that some Pennsylvania animals have developed in order to survive.

Other Activity Options:

In addition to the specific classroom activities on the left, the LEEP Staff can work with teachers to bring many of the activities in our Program Options Guide into the classroom or onto the school grounds for grades 3 through 5. Teachers simply need to discuss what indoor and outdoor resources are available for use when they register for a program, and the LEEP Staff will design a unique experience for their classes. The Program Options Guide can be found on LEEP's website:
